DETAILED ACTION

Drawings

Figures 3 and 6 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance. See Figure 1 of Chang (US 6,676,050), and Figure 1 and Figure 5 of Ho (US 2002/0100827).

Specification

The disclosure is objected to under 37 CFR 1.71, as being nonstatutory description. In the specification or drawings, there is no description of pressed grains (page 4, line 20). Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 3725

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, pressed grains (line 21), which was not described in the specification. See the above objection to the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Tsai (US 6,065,696). It is not considered that the "compact disc" is being positively claimed.

With regard to claim 1, Tsai discloses a dual function paper shredder including:

- 1. a top cover (2);
- 2. a base (3);
- 3. a paper insertion opening (11) or opening (11) for a shredder (30, Figure 1);
- 4. a compact disc insertion opening (12) or opening (12) for a stripper (32, Figure 1);
- 3. an electric motor (20); Tsai's disclosure of a motor for his paper shredder is considered to inherently disclose an electric motor;
- 4. a decelerator (21, 31, 33);

Art Unit: 3725

5. two cutting tool sets (30, 32).

- 6. two sets of cutting blades with peripherally mounted with bayonet-like cutting edges (30; Figure 1); and
- 7. two cylindrical rotary cutters (32).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tsai (US 6,065,696) in view of Chang (US 6,676,050), where the claim is considered to inferentially include a "compact disc." Tsai discloses substantially all of the claimed structure including two openings for two sets of rotary cutters with the exception of one of the openings directing a compact disc to a compact disc breaking rotary cutters. In a closely related art, Chang discloses a paper shredder with two openings with one of the openings directing a compact disc to a compact disc breaking rotary cutters in order to have one opening for a paper and the other for a compact disc. Therefore, it would have been obvious to one skilled in the art at the time the invention was made to provide Tsai with one of the openings directing a compact disc to a compact disc breaking rotary cutters in order to have one opening for a paper and the other for a compact disc to a compact disc

Art Unit: 3725

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Y Pahng whose telephone number is 571 272 4522. The examiner can normally be reached on 9:00 AM - 7:00 PM, Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allen Ostrager can be reached on 571 272 4521. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
